## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The following is a statement of reasons for the indication of allowable subject matter: The claims are allowable over the art of record because the prior art does not teach a controller for controlling an element value of the load impedance element so as to set a current flowing on the housing to be equal to or smaller than a predetermined value when the radio communication apparatus transmits the radio signal, thereby controlling a specific absorption rate (SAR) to be equal to or smaller than a predetermined value, and in combination with the remaining claimed limitations.

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Phillips et al, Ohno et al., Wen et al., Hankui et al. and Monma et al. are cited as of interested and illustrated a similar structure to a radio antenna assembly.
